Professional Summary

Experience as a Software Engineer includes 1+ year of production delivery across Go and TypeScript systems with PostgreSQL and Amazon Web Services (AWS) for job-intelligence and patient-care products. Primary contributions span backend services, search, and applied AI, with decisions validated through tests, benchmarks, deployment, and production monitoring.

Work Experience

Software Engineer

Sep 2025 to Present

Dexaminds, Hyderabad

- Designed SpotMyJob's service boundaries and built 2 Go microservices for employer-source governance and job transformation, using versioned contracts to keep 3 services independently deployable and connect canonical jobs to seeker-facing hybrid search
- Improved vector-heavy reader-feed ingestion by **17x**, from about 238 seconds to 13.7 seconds per fixed benchmark page, through half-precision HNSW tuning and redundant-index removal while retaining **98.2% recall@10** versus a 98.3% baseline
- Increased transformation throughput by **64%** under fixed compute limits and cut projected PostgreSQL reference-data load time by **more than 90%**, from 30.2 minutes to 2 minutes 34 seconds, using bounded concurrency and PostgreSQL COPY with transactional staging and set-based deduplication
- Built replay-safe downstream ingestion with durable cursors, idempotent writes, tombstones, and served-set reconciliation; reduced recurring external fetches by **43%** through change-aware selection and an alarmed full-scan fallback
- Collaborated across product and engineering as primary contributor to Osulo's Go ingestion and Clinical Document Intelligence services, integrating model APIs from Vertex AI Gemini and Azure OpenAI GPT within AWS workflows; measured 52-second ingestion and a 0.2-second handoff

Software Engineer Intern

Jun 2025 to Sep 2025

Dexaminds, Hyderabad

- Delivered **15+ frontend and backend production fixes** after root-cause analysis and pre-deployment validation with Chrome DevTools and server logs

Skills

Programming Languages: Go | TypeScript | Python | SQL

Backend & APIs: REST API Design

Databases: PostgreSQL | MongoDB

Cloud & DevOps: Amazon Web Services (AWS) | Terraform | Docker | CI/CD

Testing: Unit Testing | Integration Testing | Contract Testing

Frontend: React | Next.js

Projects

ResumeCanvas | Live | Next.js 16, React 19, MongoDB, TypeScript, Groq AI, Puppeteer

Dec 2025

- Built an AI-assisted resume platform with caching and 7 targeted MongoDB indexes, keeping responses under **100ms** and reducing query load by **60%**
- Added 8 features for ATS scoring, keyword analysis, cover letters, and job matching; reached **95.2%** test coverage across 129 tests and 220 assertions
- Built 5 resume templates with real-time preview, Puppeteer PDF export, Zod validation, and public sharing through custom slugs

Education

GITAM University, Bachelor of Technology in Computer Science | CGPA: 8.2/10

Aug 2021 to Jun 2025

Certifications

- IBM Full Stack Software Developer** | Coursera | Jan 2025
- AWS Cloud Foundations & Cloud Architecting** | AWS Academy | May to Jun 2024
- MongoDB Python Developer Path** | MongoDB University | Nov 2025
