Professional Summary

Software Engineer with 1+ year of production experience across backend and full stack: Go microservices, PostgreSQL data pipelines, and React product UI on Amazon Web Services (AWS), in job intelligence and patient care. Researches options against official documentation before writing code, works daily with Claude Code, Codex, and Cursor, and ships a change once tests, benchmarks, and CloudWatch metrics agree.

Work Experience

Software Engineer Sep 2025 to Present
Dexaminds, Hyderabad

- Led SpotMyJob's pre-build sourcing research, then designed and own its 2 Go microservices on AWS ECS, SQS, and EventBridge with Terraform, Docker, and GitHub Actions, feeding a Node.js search service over REST
- Re-sized transform concurrency on measured load, not an assumed CPU count: **64%** more throughput, no new infrastructure; made feed ingestion **17x** faster by dropping a pgvector index no query read, at **98.2% recall@10**
- Traced an **84%** job-board failure rate to a per-IP rate limit and shipped pacing the same day (**1.1%**); cut recurring fetches **43%** by reading only boards that could have changed, with an alarmed full sweep
- Shipped production **React** features (TypeScript, TanStack Query, Tailwind CSS) with their Fastify APIs: "Did you mean" search that never auto-applies, draft-then-apply filters, and onboarding gated on match inputs
- Built Osulo's Go ingestion and LLM extraction services on AWS Step Functions, routing Vertex AI, Azure OpenAI, and Amazon Bedrock through a validation gate; a multi-page lab report ran upload to structured result in **62 s**

Software Engineer Intern Jun 2025 to Sep 2025
Dexaminds, Hyderabad

- Built reusable React and TypeScript components with lazy loading and code splitting, shipping tested UI-to-API changes in Agile sprints
- Delivered **15+ frontend and backend production fixes** after root-cause analysis and pre-deployment validation with Chrome DevTools and server logs

Skills

Programming Languages: Go (Golang) | TypeScript | Python | SQL
Backend: Microservices | REST APIs | Event-Driven Architecture | Node.js
Databases: PostgreSQL | pgvector | MongoDB
Cloud & CI/CD: AWS (ECS, SQS, EventBridge, Step Functions, CloudWatch) | Terraform | Docker | GitHub Actions
AI Engineering: LLM Integration | Claude Code | Codex | Cursor
Frontend: React | Next.js | TanStack Query

Projects

ResumeCanvas | Live | Next.js 16, React 19, MongoDB, TypeScript, Groq AI, Puppeteer Dec 2025

- Optimized API responses to under **100ms** through caching and reduced MongoDB query load by **60%** with 7 targeted indexes
- Implemented 8 AI-assisted features for ATS scoring, keyword analysis, cover letters, and job matching; reached **95.2%** test coverage across 129 tests and 220 assertions
- Created 5 resume templates with real-time preview, Puppeteer PDF export, Zod validation, and public sharing through custom slugs

Education

GITAM University, Bachelor of Technology in Computer Science | CGPA: 8.2/10 Aug 2021 to Jun 2025

Certifications

- **AWS Cloud Foundations & Cloud Architecting** | AWS Academy | May to Jun 2024
- **IBM Full Stack Software Developer** | Coursera | Jan 2025
- **MongoDB Python Developer Path** | MongoDB University | Nov 2025
