Professional Summary

Experience as a Software Engineer spans Go and TypeScript systems with PostgreSQL and Amazon Web Services (AWS) across job intelligence and patient-care products. Primary contributions cover backend services, search, and applied AI. AI supports research, implementation, debugging, and review, while decisions are validated through tests, benchmarks, deployment, and production monitoring.

Work Experience

Software Engineer

Sep 2025 to Present

Dexaminds, Hyderabad

- Designed SpotMyJob's service boundaries and built 2 Go microservices for employer-source governance and job transformation, using versioned contracts to keep 3 services independently deployable
- Increased transformation throughput by **64%** under fixed compute limits, improved vector ingestion by **17x**, and cut a PostgreSQL load from over 30 minutes to under 3 minutes using bounded concurrency, PostgreSQL connection-pool sizing, HNSW index tuning, and PostgreSQL COPY
- Implemented hybrid search across 4 signals with pgvector, PostgreSQL full-text search, skill identity, and query relevance, combining results through Reciprocal Rank Fusion; integrated Cloudflare Workers AI through an OpenAI-compatible API for versioned embeddings
- Developed Osulo's Go document-ingestion and Clinical Document Intelligence Service as primary contributor, integrating Vertex AI Gemini and Azure OpenAI GPT for structured clinical data extraction; measured 52-second ingestion, 48-second extraction, and a 0.2-second handoff
- Collaborated with product and engineering peers across 2 platforms in a fast-paced startup, shipping application and AWS infrastructure changes through code review, automated tests, GitHub Actions, and CloudWatch verification

Software Engineer Intern

Jun 2025 to Sep 2025

Dexaminds, Hyderabad

- Created reusable React and TypeScript components with lazy loading and code splitting, then integrated and tested the related API changes in Agile sprints
- Delivered **15+ frontend and backend production fixes** using Chrome DevTools and server logs, tracing root causes and validating each change before deployment

Technical Skills

Languages: Go | TypeScript | Python | SQL

Backend & APIs: REST APIs | Microservices | Fastify | OpenAPI

Data & Search: PostgreSQL | MongoDB | pgvector | Hybrid Search

Cloud & Delivery: Amazon Web Services (AWS) | Terraform | Docker | GitHub Actions (CI/CD)

Applied AI: LLM API Integration | Embedding Systems

Testing: Unit Testing | Integration Testing | Contract Testing

Frontend: React | Next.js | Tailwind CSS

Projects

ResumeCanvas | Live | Next.js 16, React 19, MongoDB, TypeScript, Groq AI, Puppeteer

Dec 2025

- Built an AI-assisted resume platform with caching and 7 targeted MongoDB indexes, keeping responses under **100ms** and reducing query load by **60%**
- Added 8 features for ATS scoring, keyword analysis, cover letters, and job matching; reached **95.2%** automated test coverage across 129 tests and 220 assertions

Education

GITAM University, Bachelor of Technology in Computer Science | CGPA: 8.2/10

Aug 2021 to Jun 2025

Certifications

- IBM Full Stack Software Developer** | Coursera | Jan 2025
- AWS Cloud Foundations & Cloud Architecting** | AWS Academy | May to Jun 2024
- MongoDB Python Developer Path** | MongoDB University | Nov 2025
