Professional Summary

Software Engineer with 1+ year of production experience building Go and TypeScript systems with PostgreSQL and Amazon Web Services (AWS) across job intelligence and patient care. Work spans backend services, hybrid search, applied AI, testing, deployment, and production monitoring.

Work Experience

Software Engineer

Sep 2025 to Present

Dexaminds, Hyderabad

- Designed SpotMyJob's service boundaries and built 2 Go microservices for employer data-source governance and canonical job transformation, using versioned contracts to keep 3 services independently deployable and connect job data to seeker-facing hybrid search
- Improved vector-heavy feed ingestion by **17x**, from 238 seconds to 13.7 seconds per fixed benchmark batch, through half-precision HNSW tuning and redundant-index removal while retaining **98.2% recall@10** versus a 98.3% baseline
- Increased transformation throughput by **64%** under fixed compute through bounded concurrency; loaded PostgreSQL reference data in 2 minutes 34 seconds using COPY with transactional staging and set-based deduplication versus 30.2 minutes projected for the prior row-wise approach
- Built retry-safe downstream ingestion with durable cursors, idempotent writes, tombstones, and producer-declared complete-set reconciliation; reduced recurring external fetches by **43%** through change-aware selection with failure alarms and a full-scan fallback
- Built Osulo's Go ingestion and Clinical Document Intelligence services with product and engineering peers using AWS, Terraform, Docker, CI/CD, and contract tests; integrated Vertex AI Gemini and Azure OpenAI GPT with a 200ms handoff

Software Engineer Intern

Jun 2025 to Sep 2025

Dexaminds, Hyderabad

- Delivered **15+ frontend and backend production fixes** after root-cause analysis and pre-deployment validation with Chrome DevTools and server logs

Skills

Programming Languages: Go | TypeScript | Python | SQL

Backend & APIs: REST API Design

Databases: PostgreSQL | MongoDB

Cloud & DevOps: Amazon Web Services (AWS) | Terraform | Docker | CI/CD

Testing: Unit Testing | Integration Testing | Contract Testing

Frontend: React | Next.js

Projects

ResumeCanvas | Live | Next.js 16, React 19, MongoDB, TypeScript, Groq AI, Puppeteer

Dec 2025

- Optimized API responses to under **100ms** through caching and reduced MongoDB query load by **60%** with 7 targeted indexes
- Implemented 8 AI-assisted features for ATS scoring, keyword analysis, cover letters, and job matching; reached **95.2%** test coverage across 129 tests and 220 assertions
- Created 5 resume templates with real-time preview, Puppeteer PDF export, Zod validation, and public sharing through custom slugs

Education

GITAM University, Bachelor of Technology in Computer Science | CGPA: 8.2/10

Aug 2021 to Jun 2025

Certifications

- AWS Cloud Foundations & Cloud Architecting** | AWS Academy | May to Jun 2024
- IBM Full Stack Software Developer** | Coursera | Jan 2025
- MongoDB Python Developer Path** | MongoDB University | Nov 2025
