Professional Summary

Software Engineer with 1+ year of experience across backend and full stack: Go microservices, PostgreSQL data pipelines, and React UI on Amazon Web Services (AWS), for job-intelligence and healthcare document platforms. Researches options against official documentation before coding, works daily with Claude Code, Codex, and Cursor, and verifies changes with tests, benchmarks, and CloudWatch metrics.

Work Experience

Software Engineer Sep 2025 to Present
DexaMinds, Hyderabad

- Wrote SpotMyJob's pre-build sourcing research, then started and own its 2 Go microservices on AWS ECS, SQS, and EventBridge with Terraform, Docker, and GitHub Actions, feeding a Node.js search service over REST
- Re-sized transform concurrency on measured load: **64%** more throughput, no new infrastructure; moved pgvector HNSW to half precision (98.2% recall@10) and dropped the old index for **17x** faster ingestion
- Removed **88%** of a job-board sweep's requests by proving, field by field, that a list endpoint already returned the data per-item calls fetched; ETag revalidation now answers **83%** of board reads with 304
- Shipped **React** features (TypeScript, TanStack Query, Tailwind CSS) with their Fastify APIs: "Did you mean" search that never auto-applies, draft-then-apply filters, and onboarding gated on match inputs
- For a client's healthcare platform (Apr to Jun 2026), built Go ingestion and LLM extraction on Step Functions with Gemini, Vertex AI, Azure OpenAI, and Bedrock adapters; a lab report ran scanned file to result in **62 s**

Software Engineer Intern Jun 2025 to Sep 2025
DexaMinds, Hyderabad

- Built reusable React and TypeScript components with lazy loading and code splitting, shipping tested UI-to-API changes in Agile sprints
- Delivered **15+ frontend and backend production fixes** after root-cause analysis and pre-deployment validation with Chrome DevTools and server logs

Skills

Programming Languages: Go (Golang) | TypeScript | Python | SQL
Backend: Microservices | REST APIs | Event-Driven Architecture | Node.js
Databases: PostgreSQL | pgvector | MongoDB
Cloud & CI/CD: AWS (ECS, SQS, EventBridge, Step Functions, CloudWatch) | Terraform | Docker | GitHub Actions
AI Engineering: LLM Integration | Claude Code | Codex | Cursor
Frontend: React | Next.js | TanStack Query

Projects

ResumeCanvas | Live | Next.js 16, React 19, MongoDB, TypeScript, Groq AI, Puppeteer Dec 2025

- Built Groq Llama 3.3 70B features for resume review, keyword analysis, bullet and cover-letter writing, interview questions, and job matching
- Modeled MongoDB with compound indexes on the per-user read paths and an in-memory cache; **118** unit and performance tests reach **81.6%** line coverage
- Created 5 resume templates with real-time preview, Puppeteer PDF export, Zod validation, and public sharing through custom slugs

Education

GITAM University, Bachelor of Technology in Computer Science | CGPA: 8.2/10 Aug 2021 to Jun 2025

Certifications

- **AWS Academy Graduate: Cloud Architecting** | AWS Academy | May to Jun 2024
- **IBM Full Stack Software Developer** | Coursera | Jan 2025
- **MongoDB Python Developer Path** | MongoDB University | Nov 2025
