## Professional Summary

Software Engineer with 1+ year of production experience building Go services, React product UI, and PostgreSQL data pipelines on Amazon Web Services (AWS) across job intelligence and patient care. Works daily with Claude, Codex, and Cursor, and ships a change once tests, benchmarks, and CloudWatch metrics agree.

## Work Experience

**Software Engineer** Sep 2025 to Present
Dexaminds, Hyderabad

- Built and owned 2 Go microservices for SpotMyJob's job-data pipeline (source discovery, job processing), feeding its job-search service through versioned contracts rolled out expand-then-contract
- Shipped production **React** features on the seeker web app (TypeScript, TanStack Query, Tailwind CSS), each with its Fastify API: "Did you mean" search that never auto-applies, draft-then-apply filters, onboarding
- Proved transform was bound by round trips, not the database, and raised throughput **64%** with no new infrastructure; made feed ingestion **17x** faster by dropping an index no query read, at **98.2% recall@10**
- Cut recurring external fetches **43%** by reading only boards that could have changed, with an alarmed full sweep as fallback; rewrote feed cleanup as a hash anti-join that stays fast in every plan mode
- Built Osulo's Go ingestion and clinical-extraction services on AWS Step Functions, integrating Vertex AI Gemini and Azure OpenAI GPT behind a validation gate; a multi-page lab report ran upload to structured result in **62 s**

**Software Engineer Intern** Jun 2025 to Sep 2025
Dexaminds, Hyderabad

- Built reusable React and TypeScript components with lazy loading and code splitting, shipping tested UI-to-API changes in Agile sprints
- Delivered **15+ frontend and backend production fixes** after root-cause analysis and pre-deployment validation with Chrome DevTools and server logs

## Skills

**Programming Languages:** Go | TypeScript | Python | SQL
**Backend & APIs:** REST API Design
**Databases:** PostgreSQL | MongoDB
**Cloud & DevOps:** Amazon Web Services (AWS) | Terraform | Docker | CI/CD
**Testing:** Unit Testing | Integration Testing | Contract Testing
**Frontend:** React | Next.js | TanStack Query | Tailwind CSS

## Projects

**ResumeCanvas** | Live | Next.js 16, React 19, MongoDB, TypeScript, Groq AI, Puppeteer Dec 2025

- Optimized API responses to under **100ms** through caching and reduced MongoDB query load by **60%** with 7 targeted indexes
- Implemented 8 AI-assisted features for ATS scoring, keyword analysis, cover letters, and job matching; reached **95.2%** test coverage across 129 tests and 220 assertions
- Created 5 resume templates with real-time preview, Puppeteer PDF export, Zod validation, and public sharing through custom slugs

## Education

**GITAM University**, Bachelor of Technology in Computer Science | CGPA: 8.2/10 Aug 2021 to Jun 2025

## Certifications

- **AWS Cloud Foundations & Cloud Architecting** | AWS Academy | May to Jun 2024
- **IBM Full Stack Software Developer** | Coursera | Jan 2025
- **MongoDB Python Developer Path** | MongoDB University | Nov 2025
